Most of the books I read are recommendations from friends and family. I've found that this is a nice way of introducing variety into my reading list. The Master and Margarita appeared on my desk after my friend Ishita called it "her absolute favorite book." It became my favourite too!

Honestly, I don't really like reading. But this book changed everything. I really liked this book. It fascinated me from the first pages, so I read it in less than 3 days. I recommend to everyone!)
